MILLS AND FOX

GLADIOLUS

1955 LIST

R F D 4, Box 120 - Wapakoneta, Ohio

Telephone Lima 6-4160

Ohio Inspection Cert. #475

These are retail prepaid prices, spring delivery unless otherwise requested.  
All orders are subject to stock and prior orders.

Ten bulbs, same size and variety, for the price of 8. 5 at 10 rate. Still glad to quote on want lists for larger lots, as stock permits.

The number preceding variety name is show color classification - N A GC

"E" means early, "M" midseason and "L" late blooming season.

We are introducing our "XLO" (pronounced Excello) this season without heavy advertising because we wish it to prove its performance, and are as anxious to know where it does not do well as where it does.

XLO is a sport of Dieppe with a clean deep salmon shade here. Color classification given at Wabash, Indiana was 532 and it made best three spike in class. The previous showing was at Toledo in 1951 where it made Seedling Champ.

For us it blooms in about 80 days, 5 to 7 lightly ruffled, 5 1/2 in. florets on a 19 bud spike; field height about 60 inches. Health and propagation are better for us than "Dieppe". Excellent spiking habits.

The color is difficult to describe, such a rich smooth glowing coral salmon with slightly deeper blotch characteristic of the parent.

Our florists are enthusiastic and visitors invariably pick it in a crowded basement of cut flowers as one "I want".

Priced Large \$3.00 Medium \$2.00 Small \$1.00 Bts. 10/\$2.00.

Special growers lot - 1 large, 1 medium, 1 small, 10 bts. for \$6.00.  
Please write for quotations if interested in larger lots.

## General List
